PROFILE

As an expert full-stack developer, I bring a deep passion for creating high-performance, visually stunning, and user-centric digital products. With extensive experience in both front-end and back-end development, I specialize in building seamless web and mobile applications using technologies like ReactJS, Flutter, and Laravel. My expertise spans across the full development lifecycle, from crafting intuitive user interfaces to implementing robust server-side solutions. Driven by a commitment to excellence and continuous learning, I stay at the forefront of technological advancements to deliver cutting-edge solutions that elevate user experiences.

WORK HISTORY

Cambridge Centre of Excellence

April 2023 - June 2024

Position: Flutter Developer (Remote)

- Developed and maintained two mobile applications, streamlining organizational services and enhancing service offerings.
- Collaborated with project leads and the development team to translate UI designs into responsive mobile app frontends using Flutter.
- Implemented bug fixes and error resolution techniques, improving code integrity and reducing app crash rates, resulting in a 30% increase in user experience and customer satisfaction ratings.

EFFECTS STUDIOS

September 2022 - March 2023

Position: Flutter Developer (Contract)

- Re-wrote an existing e-commerce mobile app previously written in Swift and Kotlin with Flutter, reducing development costs by 50%.
- Wrote widgets, and integration tests for every feature developed, and set up build pipelines to ensure new features do not break existing features.
- Collaborated with backend developers, product managers, and quality assurance team in an async manner to deliver a high-quality product before the deadline.

ADEO EDU

July 2022 - August 2022

Position: Flutter Developer (Contract)

- Developed a self-prep tool that provides students with equitable access to quality content and personalised learning support using Flutter.
- Collaborated with a team of 10+ to transform UI designs into a functional workout and coaching app using Flutter and Firebase.
- Wrote widgets, and integration tests for every feature developed, and set up build pipelines to ensure new features do not break existing features.

ANU Technologies

April 2020 - July 2022

Position: Flutter & Web Developer

- Created a CGPA Calculator app using Flutter, enabling students to easily check their CGPA from their hostels without needing administrative assistance.

- Built a hostel management application that streamlined hostel manager workflows and expedited student registration, utilizing ReactJS and Laravel.
- Developed a crowdsourcing platform to support students facing financial challenges, contributing to the continuation of their education, and won the Ghana Youth Acceleration Hackathon.

The University of Ghana Computing Systems (UGCS)

September 2015 – 2018

Position: IT Support Engineer

- Configuring and optimizing development environments, including hardware, software, and network settings, to enhance Flutter application performance.
- Monitoring and maintaining application performance and server environments, responding promptly to service requests and issues.
- Conducting weekend training sessions to teach students how to use Sakai (Electronic Learning Management System) for improved digital learning experiences.
